Michael Mahaffy partnered with McGowin Patrick and co-founded the TAP Oilfields Solutions Trucking company as a platform to build a diversified Oil & Gas services company. The company is initially focused in the Eagle Ford Shale basin in South Texas. The rapid technological advances in Shale basin energy extraction from Fracturing (also know as Fracking) has resulted in many oil field opportunities.

Michael has over 20 years of experience from Wall Street at UBS and Salomon Brothers before founding RHR Capital as a diversified private investment firm. RHR Capital has invested in businesses including Financials, Real Estate, Agriculture, Energy and other alternative investments.
